

INNOVATIVE AND UNIQUE TOASTING

The Antunes' Gold Standard Toaster (GST-2V) is our newest development, establishing us as the recognized leader in bun toasting in the foodservice industry. Featuring an innovative and unique toasting system, the GST-2V provides operations with quality, reliability, and consistency in their toasting platform in a compact footprint.

The GST-2V model utilizes dual-belt technology that cradles buns as they move along the heat source, eliminating defects such as sticking, slipping, and marking. The belts are continuously moving so operators can immediately load product as needed. The energy-efficient design of the GST-2V keeps heat locked in the toasting chamber and keeps the outside surface cool to the touch.

Model: GST Gold Standard Toaster

Easy-to-operate

Versatile control panel for quick adjustments to toast quality.

Better Results

Continuously moving belts allow immediate feeding of buns without sticking providing high-quality toast each time.

Fully Customizable

Programmable controls allow users to make adjustments to Platen Heater Temperature and Motor Speed.

Gold Standard Toaster | GST

Features:

- Compact, vertical design to easily integrate into kitchen layouts.
- Energy-efficient design reduces heat loss and prevents outside surface of toaster from becoming hot.
- Continuously moving belts allow immediate feeding of buns without sticking.
- Easy-to-operate control panel for quick adjustments to toast quality
- Programmable controls allow users to make adjustments to platen heater temperature and motor speed.
